

JLG Forklift Part

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

During their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable market for a product that could swiftly and securely lift people in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into existing versions.

JLG forklifts have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the business proudly continues to expand itself into many marketplaces globally and develops new products to ensure customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
